

papercutting instructions

- Fold diagonally in half, bringing the top down. Score the fold.
- Fold in half again, this time taking the left side to the right.
- Fold the top layer only back over to the left. The left should now have six layers of paper, the right should only have two.
- Fold the two layers on the right backwards.
- Place printed design on folded triangle. Staple in place.
- Use blade included/scissors to cut away all the white bits. Unfold design.
